Outline

- Introduction
 - Quotes, poll questions, **The Big Reveal**
- Data and graphs (lots!)
 - Human progress, perception vs. reality
- **My Request (Take-Home Message)**
- Class examples
- Conclusion
 - Disclaimer, 2019-2020, more info, final quote

Quote 1: Quantitative mindset

“How can we soundly appraise the state of the world? The answer is to *count*. ... A quantitative mindset, despite its nerdy aura, is in fact the morally enlightened one, because it treats every human life as having equal value rather than privileging the people who are closest to us or most photogenic.” – Steven Pinker

Question A

- In the last 20 years, the proportion of the world population living in extreme poverty has ...?
 - Almost doubled
 - Remained more or less the same
 - Almost halved

Question B

- What percent of the world's 1-year-old children today have been vaccinated against some disease?
 - ❑ 20 percent
 - ❑ 50 percent
 - ❑ 80 percent

Question C

- Worldwide, 30-year-old men have spent 10 years in school, on average. How many years have women of the same age spent in school, on average?
 - 9 years
 - 6 years
 - 3 years

Quote 2: Most important change

“Over the past twenty years, the proportion of the global population living in extreme poverty has halved. This is absolutely revolutionary. I consider it to be the most important change that has happened in the world in my lifetime.” – Hans Rosling

Question A

- In the last 20 years, the proportion of the world population living in extreme poverty has ...?
 - ❑ Almost doubled
 - ❑ Remained more or less the same
 - ❑ ***Almost halved***

Question B

- What percent of the world's 1-year-old children today have been vaccinated against some disease?
 - ❑ 20 percent
 - ❑ 50 percent
 - ❑ **80 percent**

Question C

- Worldwide, 30-year-old men have spent 10 years in school, on average. How many years have women of the same age spent in school, on average?
 - **9 years**
 - 6 years
 - 3 years

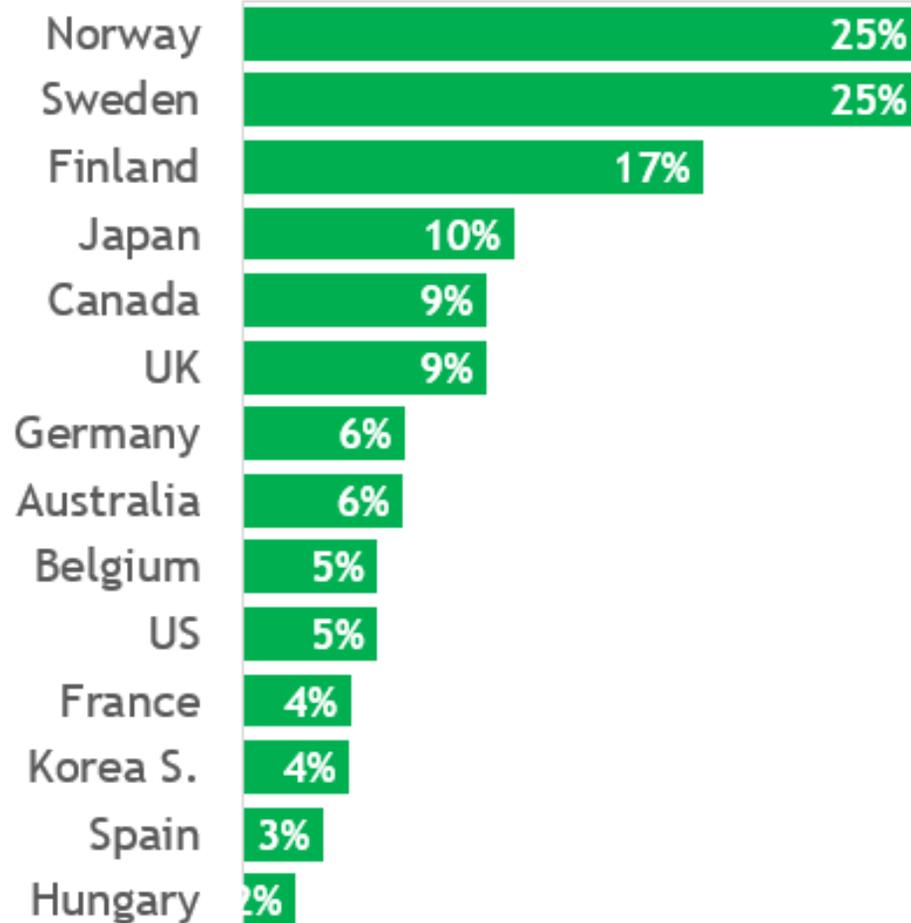

Quote 3: The big reveal!

“Here is a shocker: *The world has made spectacular progress in every single measure of human well-being.*

Here is a second shocker: *Almost no one knows about it.*” – Pinker

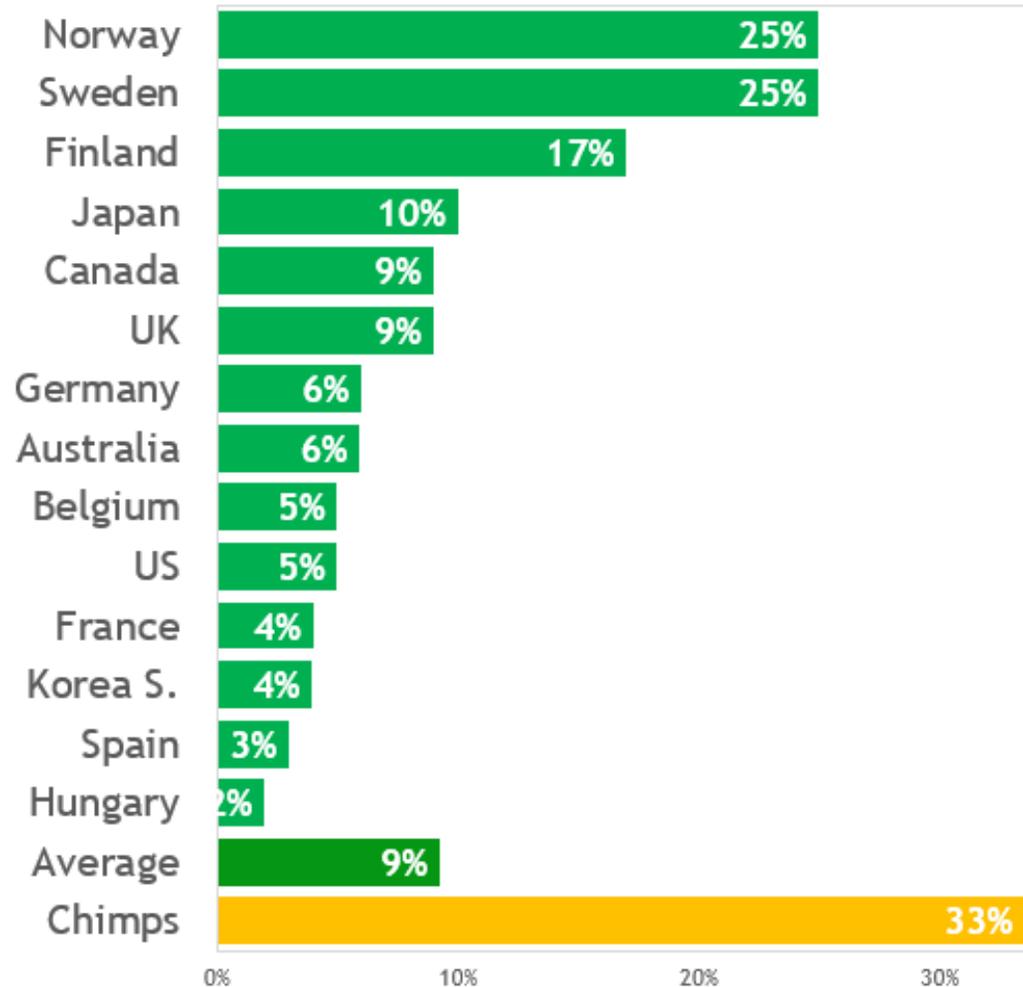

Question A (poverty)

CORRECT ANSWER: "Almost halved"

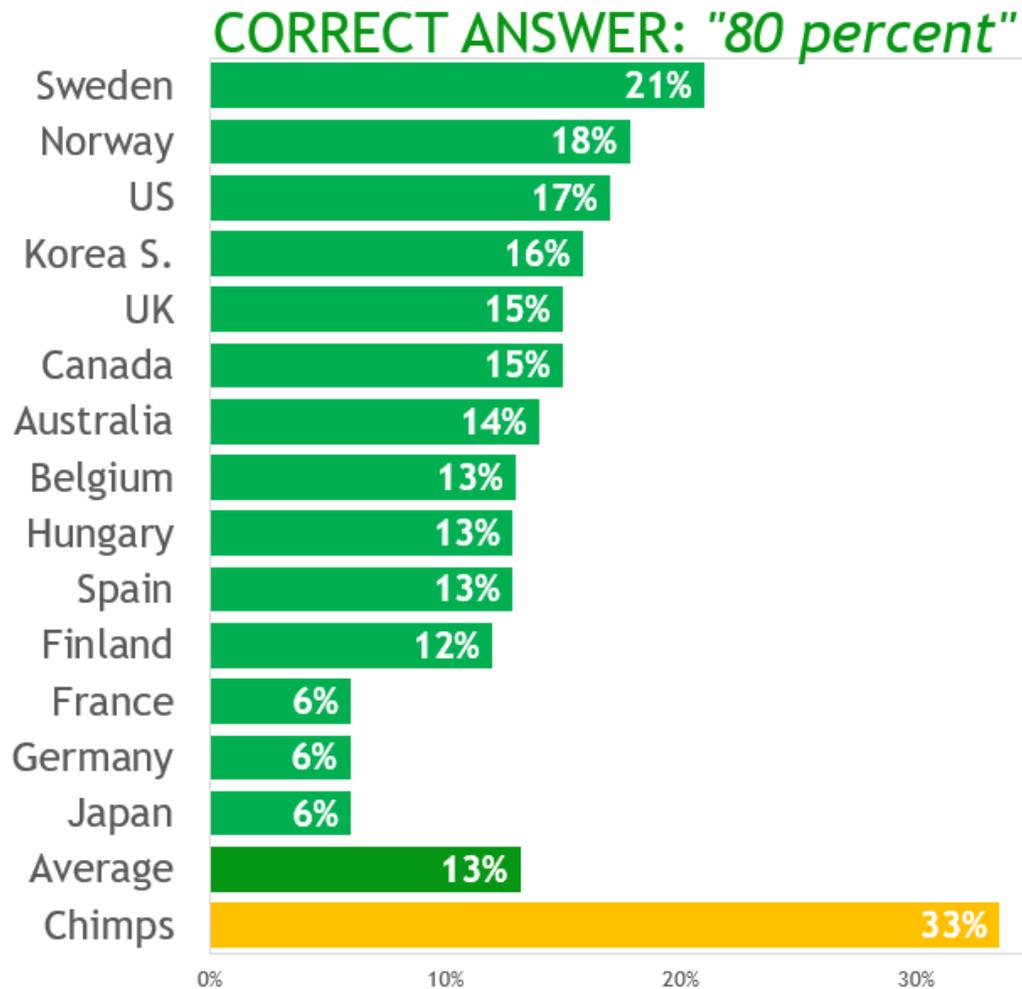

Question A (poverty)

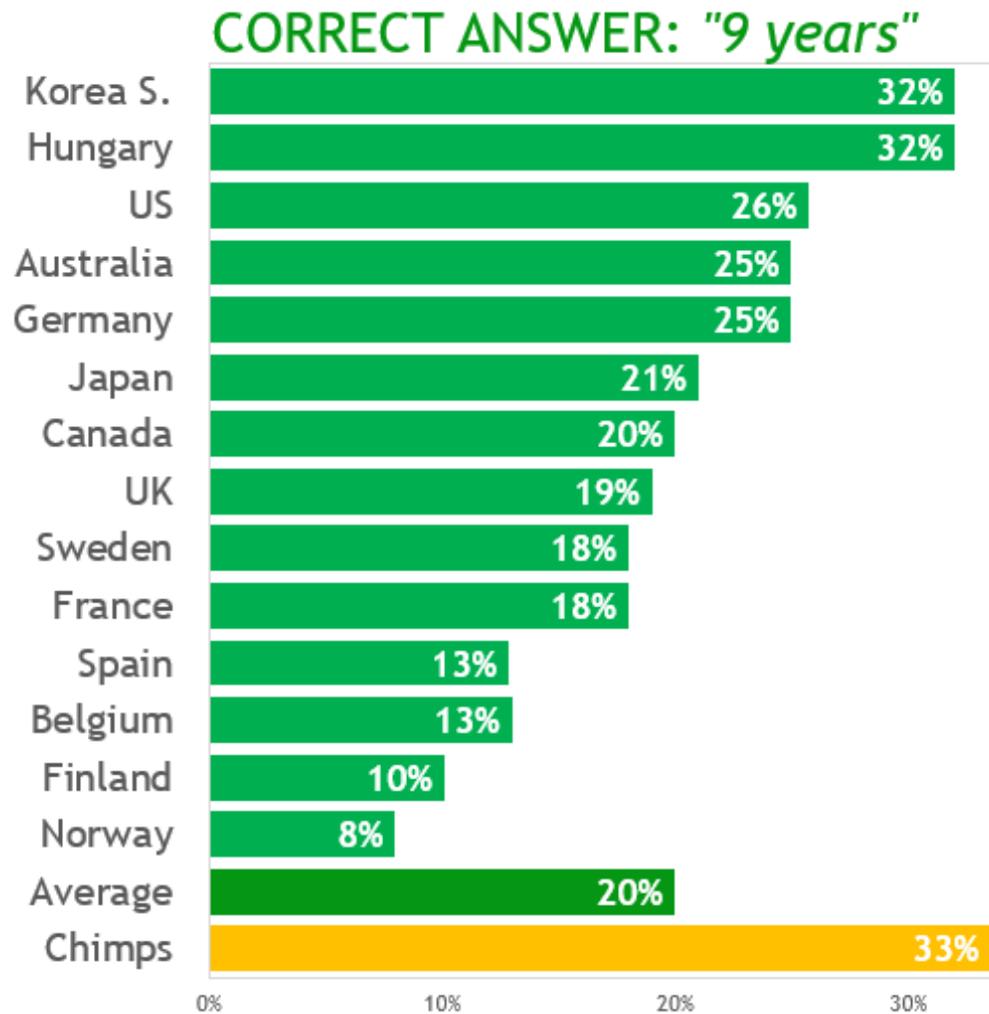

CORRECT ANSWER: "Almost halved"

Question B (vaccinations)

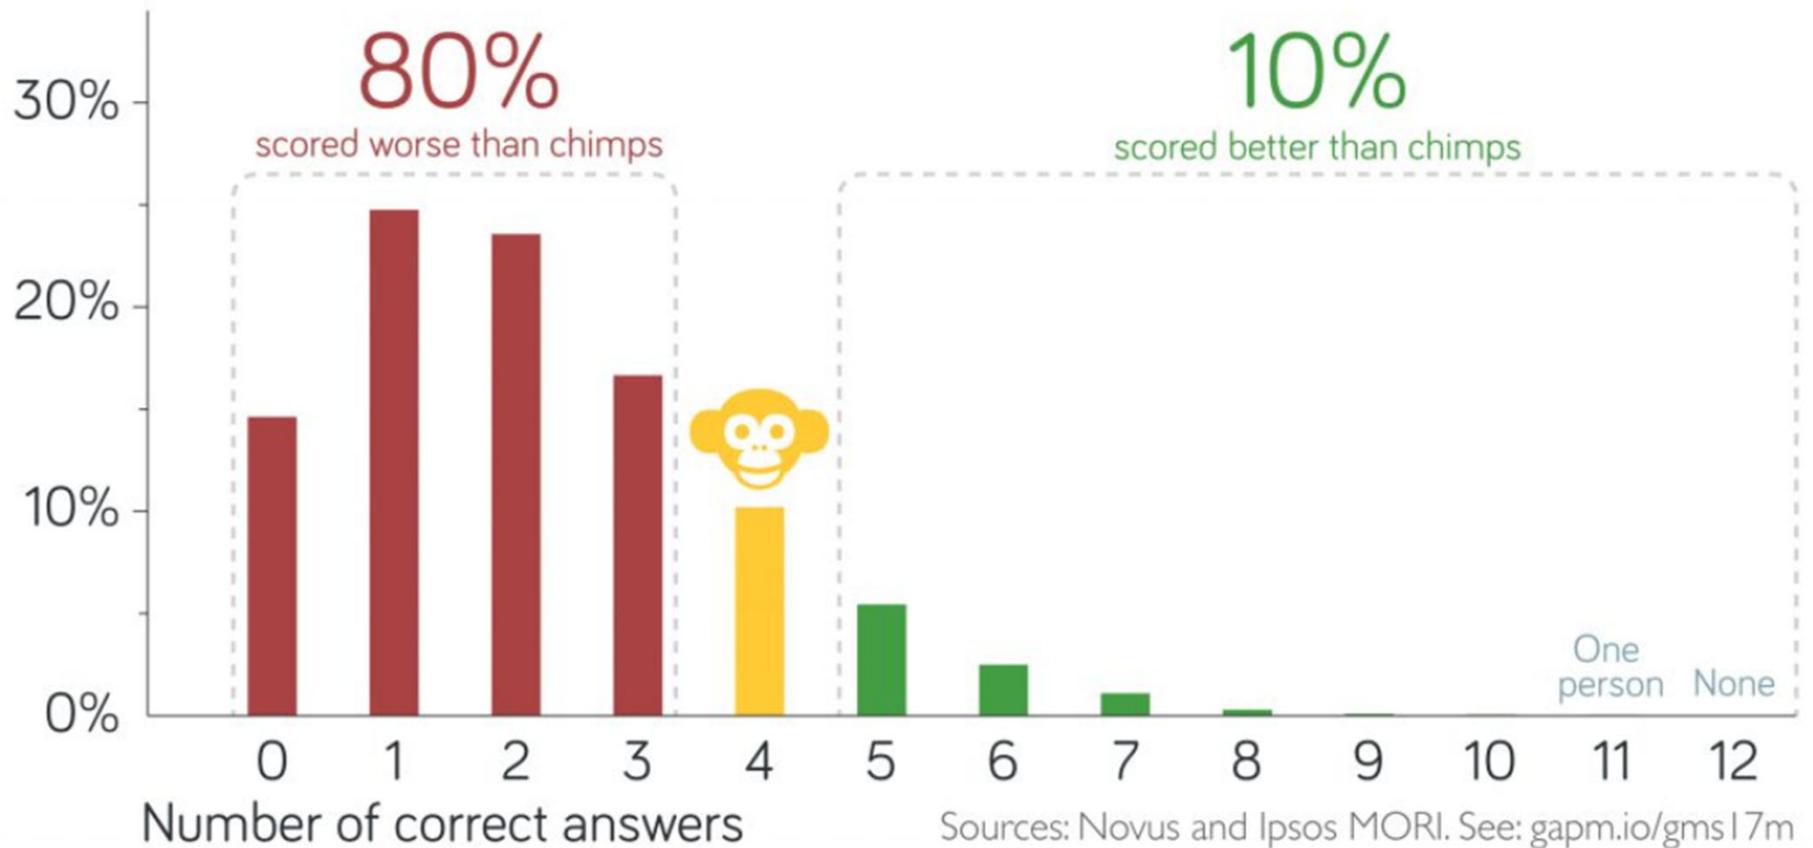

Question C (schooling)

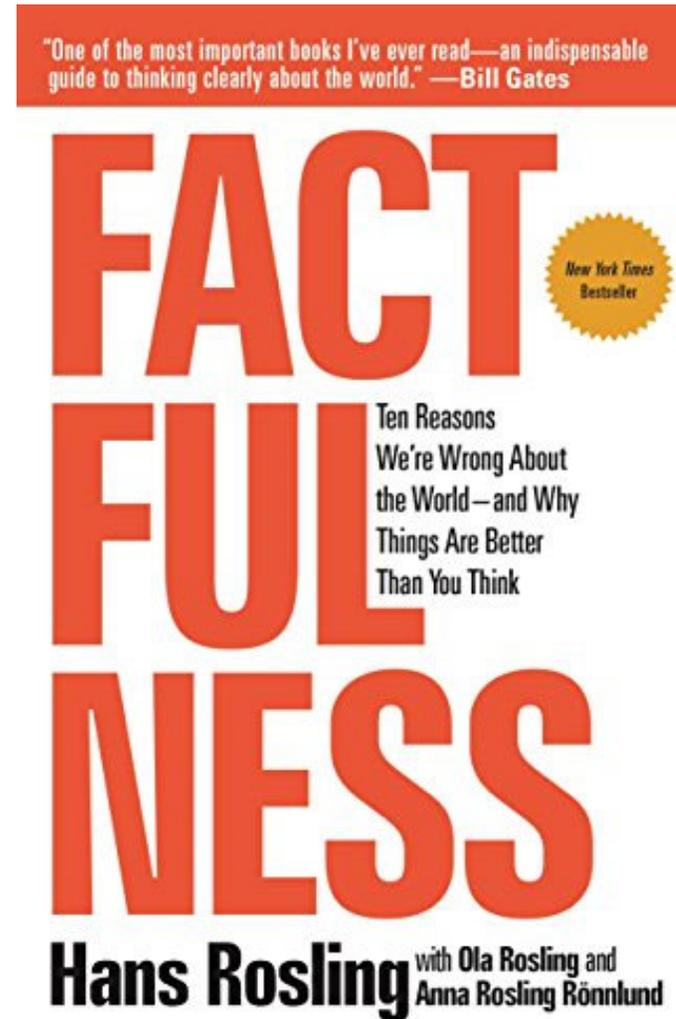

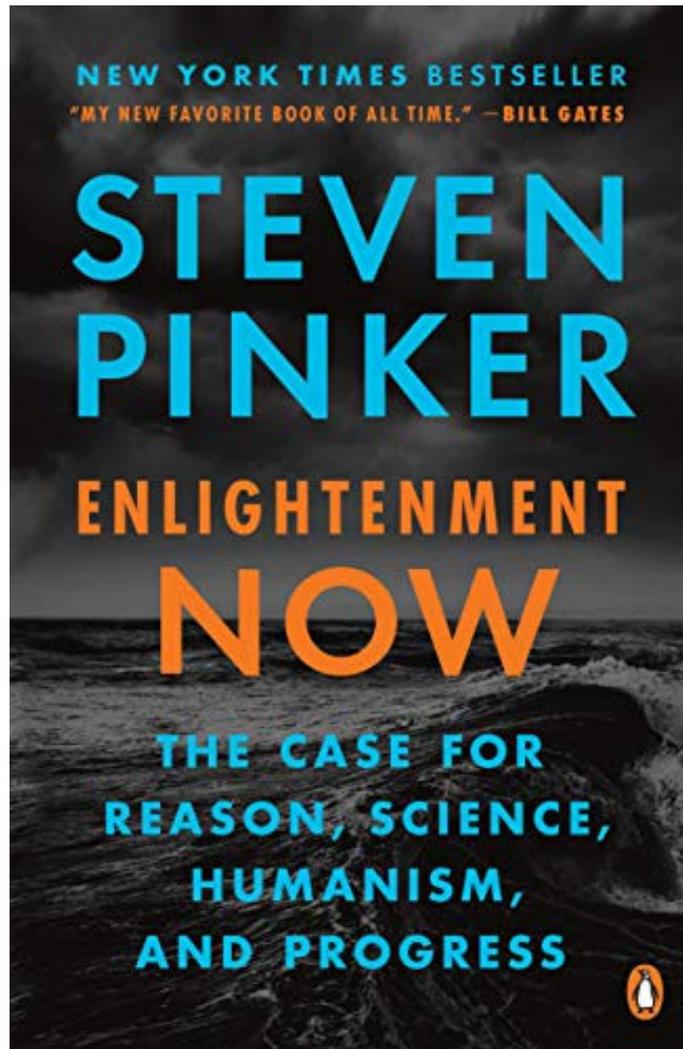

Worse than ignorance

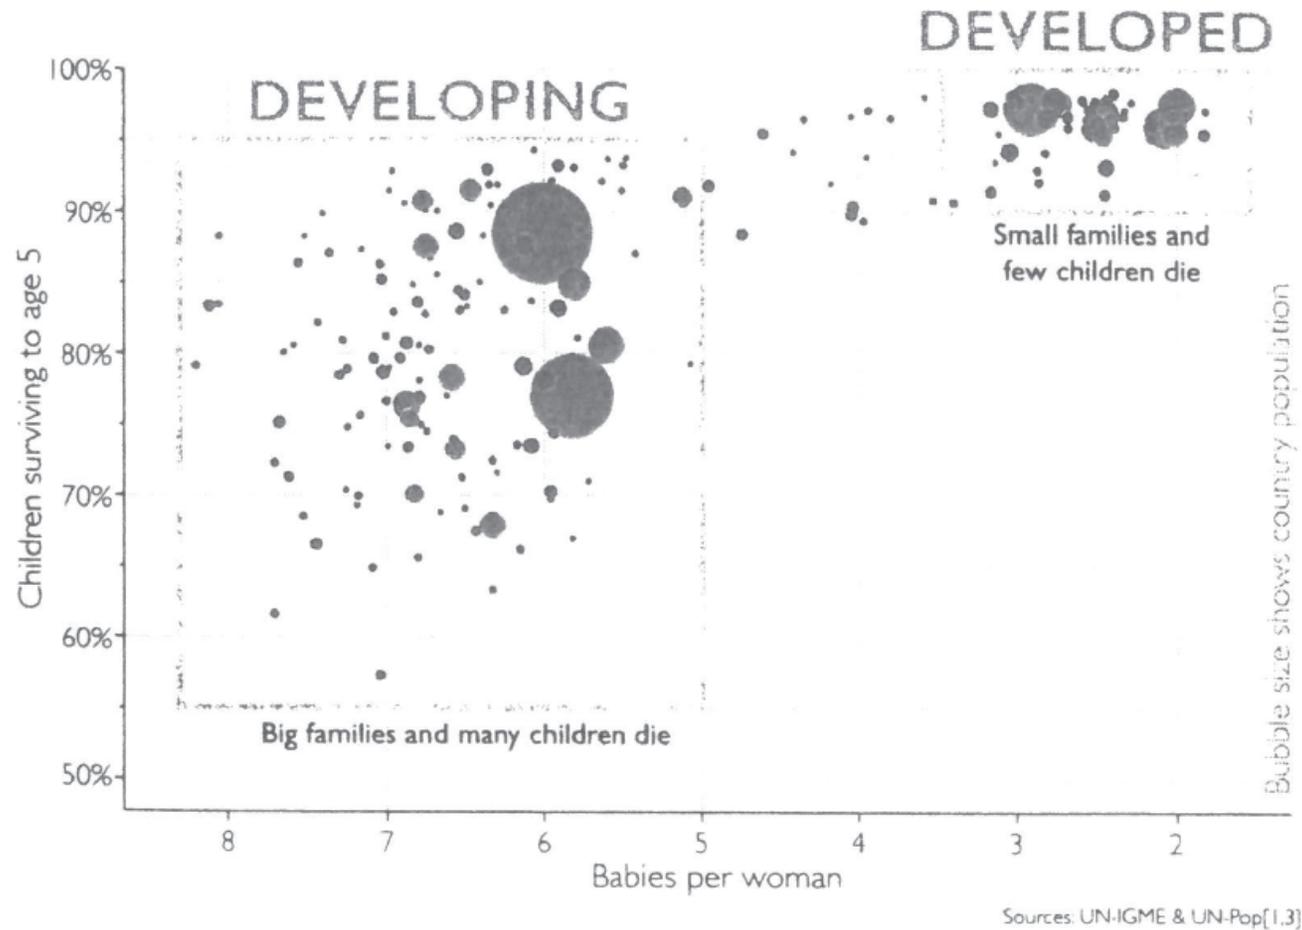

Share of humans with different scores

Gap instinct (Rosling)

Gap instinct (Rosling)

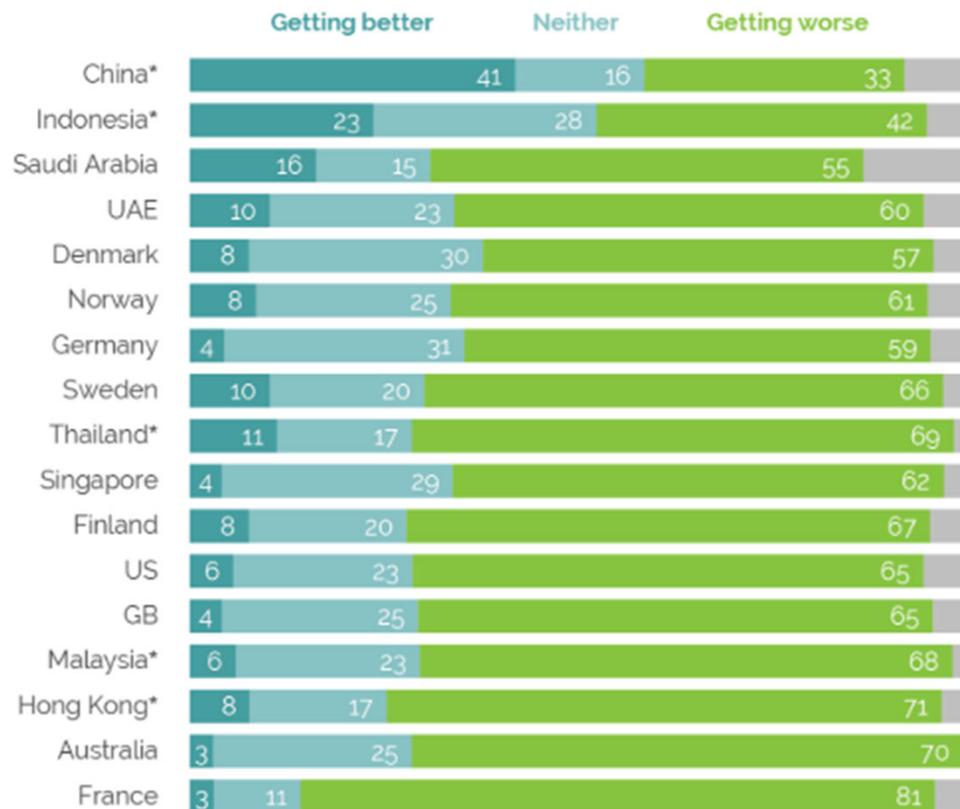

Gap instinct (Rosling)

Perception: World is getting worse

Thinking generally about the world, all things considered, do you think the world is getting better or worse, or neither getting better nor worse? 18235 adults in the following countries. Results ordered by net score (% getting better minus % getting worse)

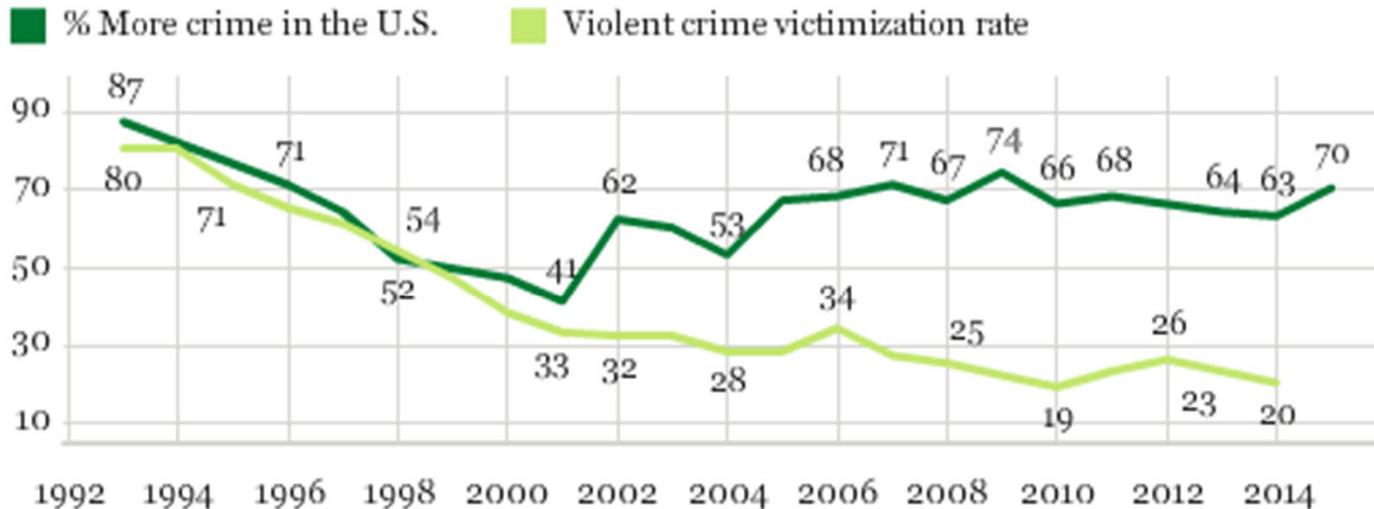

*Weighted to be representative of online population

YouGov | yougov.com

November - December 2015

Crime rate: Perception vs. actual

U.S. Violent Crime Rate[^] and Americans' Perceptions of Crime Rate vs. Year Ago

[^] Violent crime rate is number of victimizations per 1,000 persons that occurred during the year. Source: Bureau of Justice Statistics, National Crime Victimization Survey, 1993-2014

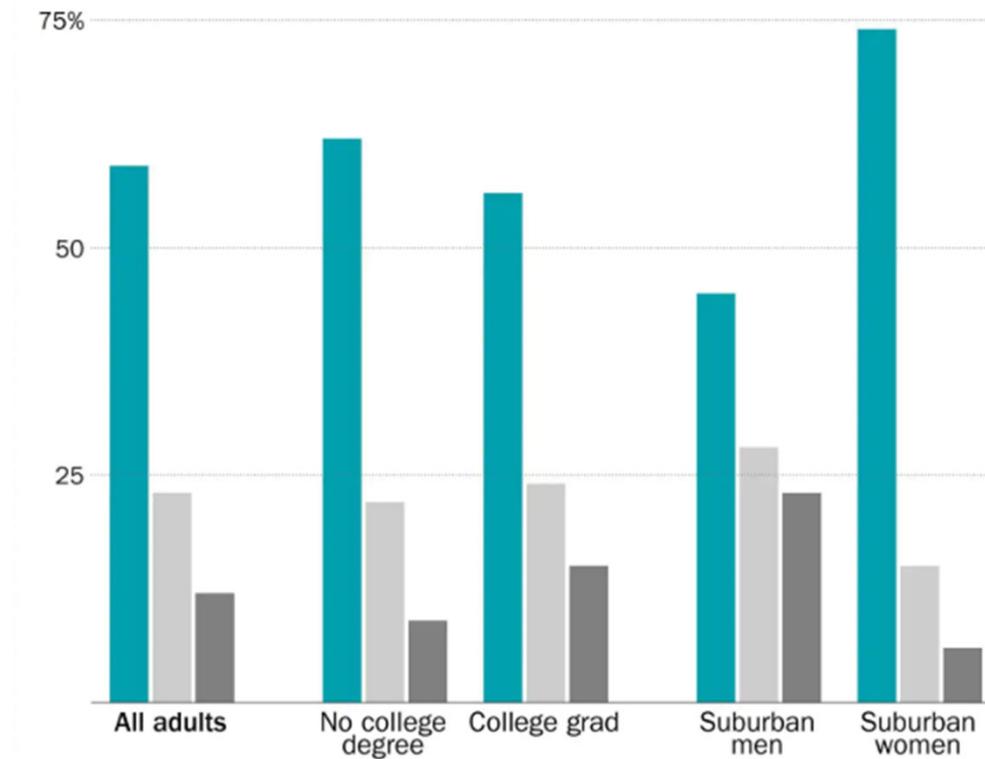

GALLUP[®]

Gun murder rate: perception

Compared to 25 years ago, how has the per capita gun murder rate in the U.S. changed?

NPR-PBS NewsHour-Marist poll, Feb. 2019

■ HIGHER ■ ABOUT THE SAME ■ LOWER

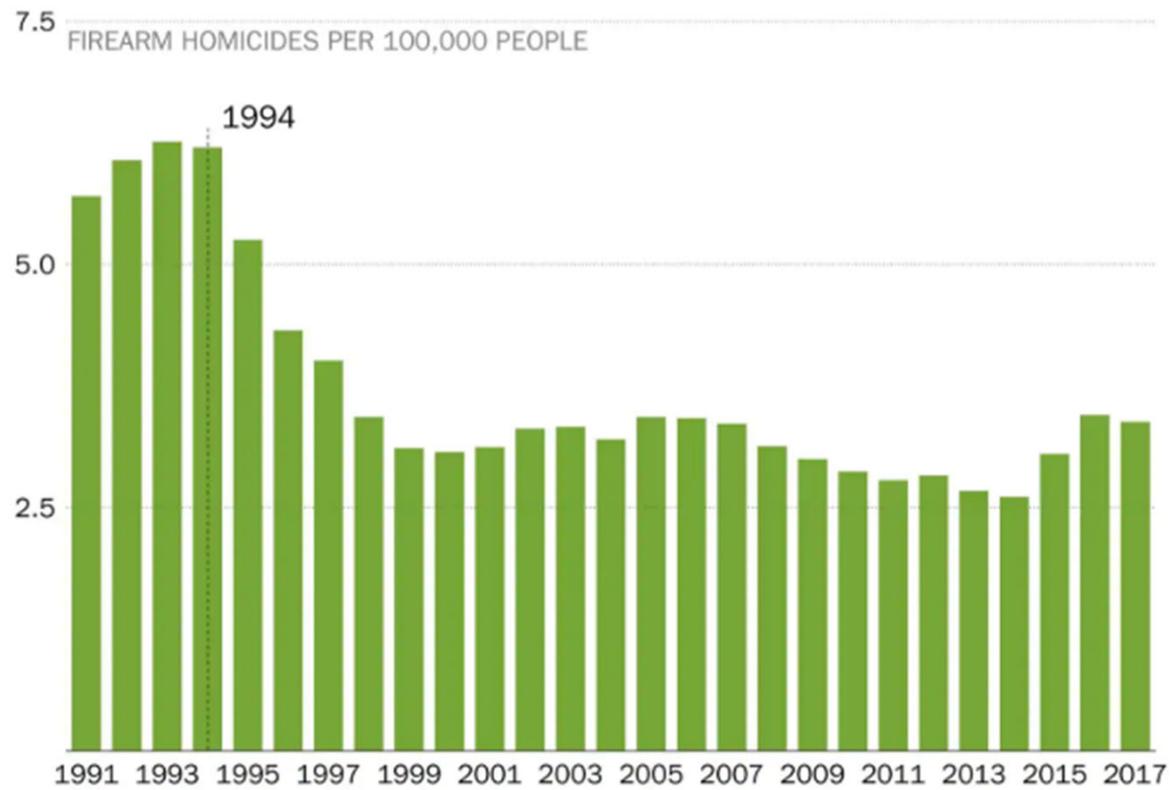

(Philip Bump/The Washington Post)

Gun murder rate: actual

Firearm murders per year as a function of population

Census Bureau, FBI Uniform Crime Reporting data

(Philip Bump/The Washington Post)

Perceived happiness of others

In every country people think that others are less happy than they themselves say  People were asked the following question “When asked in a survey, what percentage of people do you think said that, taking all things together, they are very happy or rather happy?”. The average answer is plotted on the y-axis against the actual answer on the x-axis.

Vaccine-preventable deaths

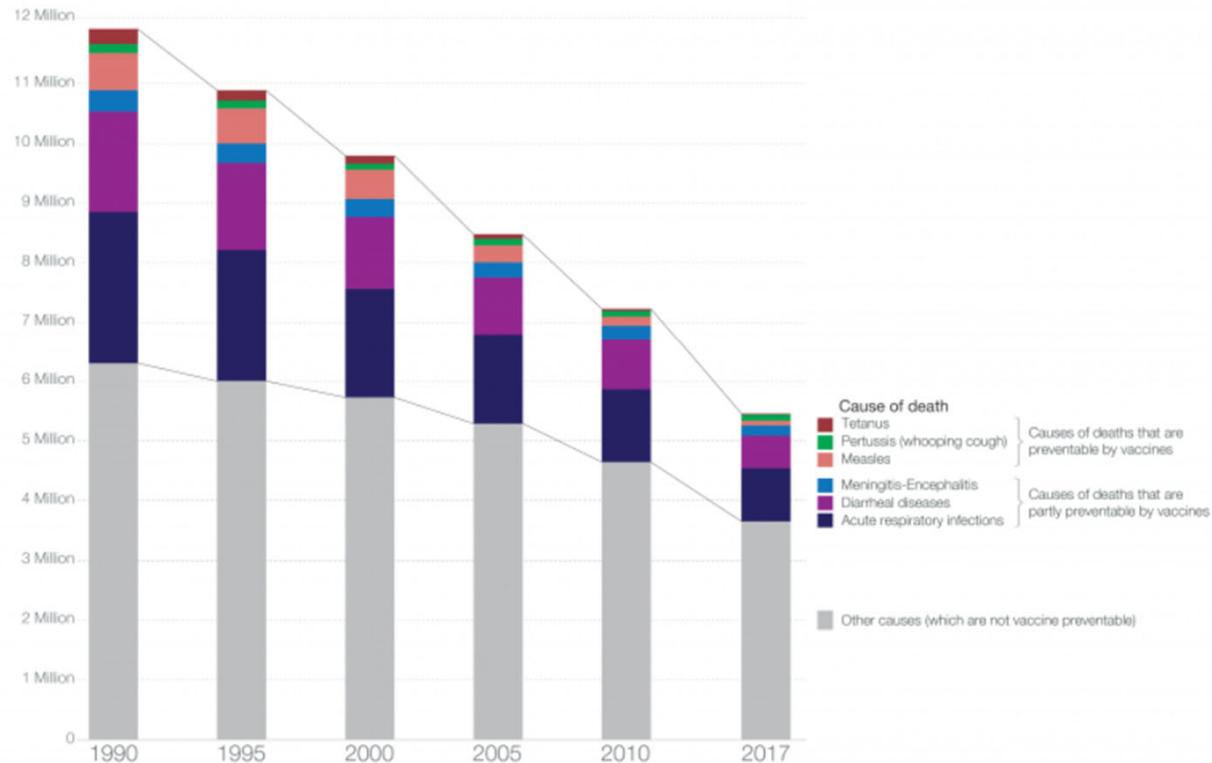

Child deaths

Global number of child deaths per year – by cause of death

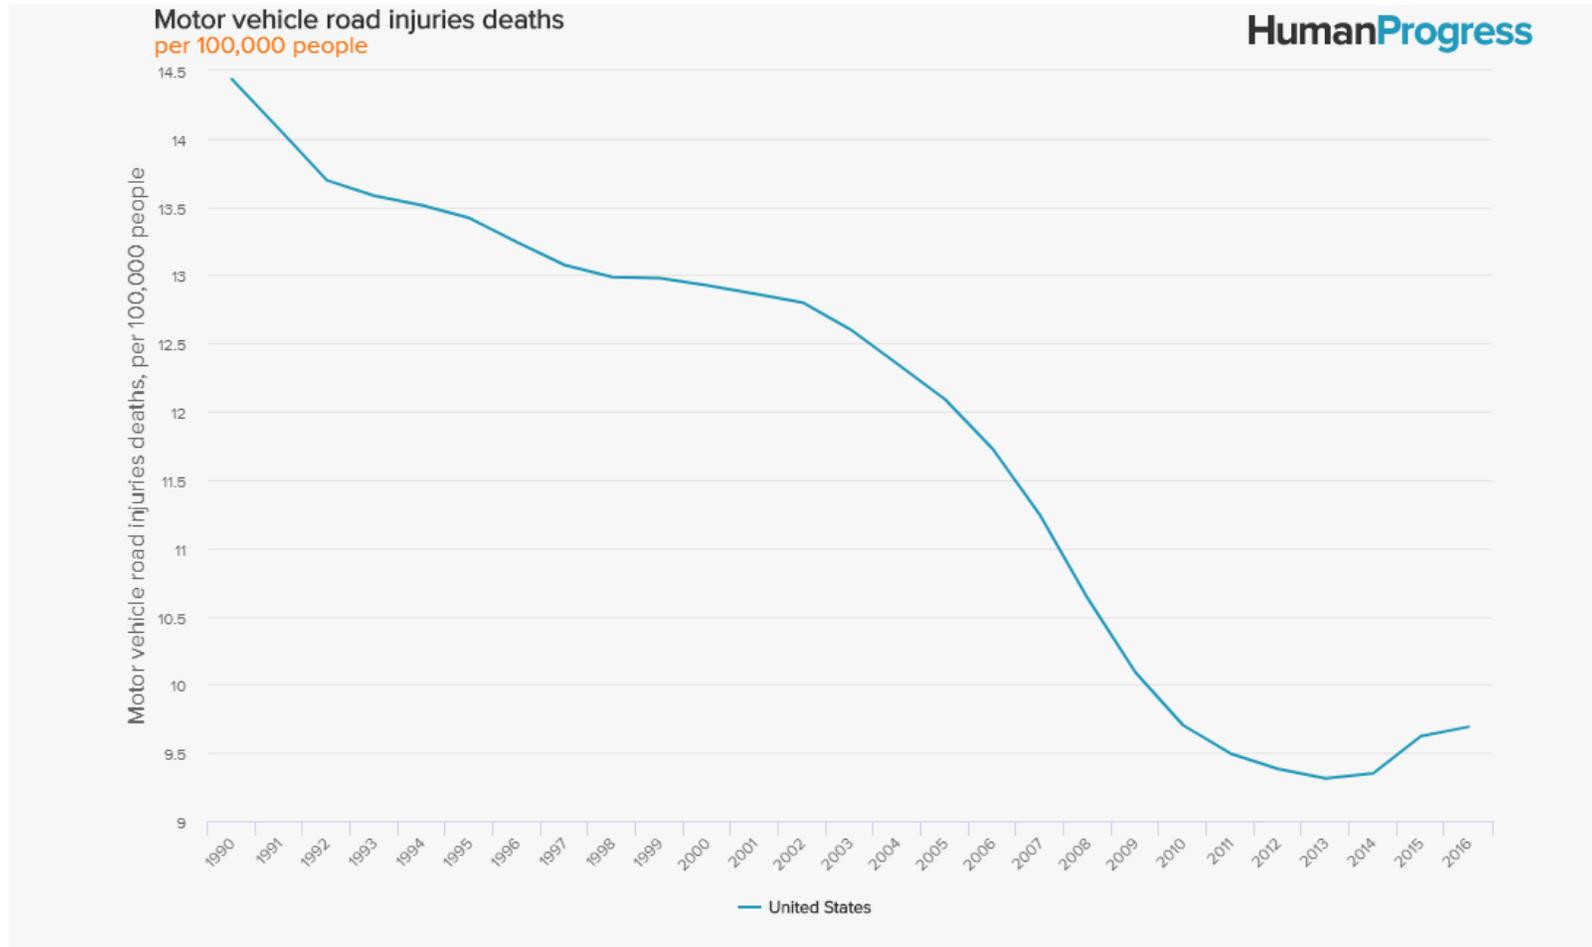

Shown is the number of children younger than 5 years who died in a year. The height of the bar shows the total number of deaths with colored sections showing the number of children who died of diseases that are wholly or partially preventable by vaccines. The number of child deaths for which there are vaccines available declined from 5.5 million deaths in 1990 to 1.8 million deaths 27 years later.

Data source: based on data from the Institute for Health Metrics and Evaluation (IHME). The data visualization is available at [OurWorldinData.org](https://ourworldindata.org). There you find research and more visualizations on global development.

Motor vehicle injuries, deaths, U.S.

Natural disaster deaths

Global annual death rate from natural disasters, by decade

Global death rate measured as the number of deaths per 100,000 of the world population. This is given as the annual average per decade (by decade 1900s to 2000s; and then six years from 2010-2015).

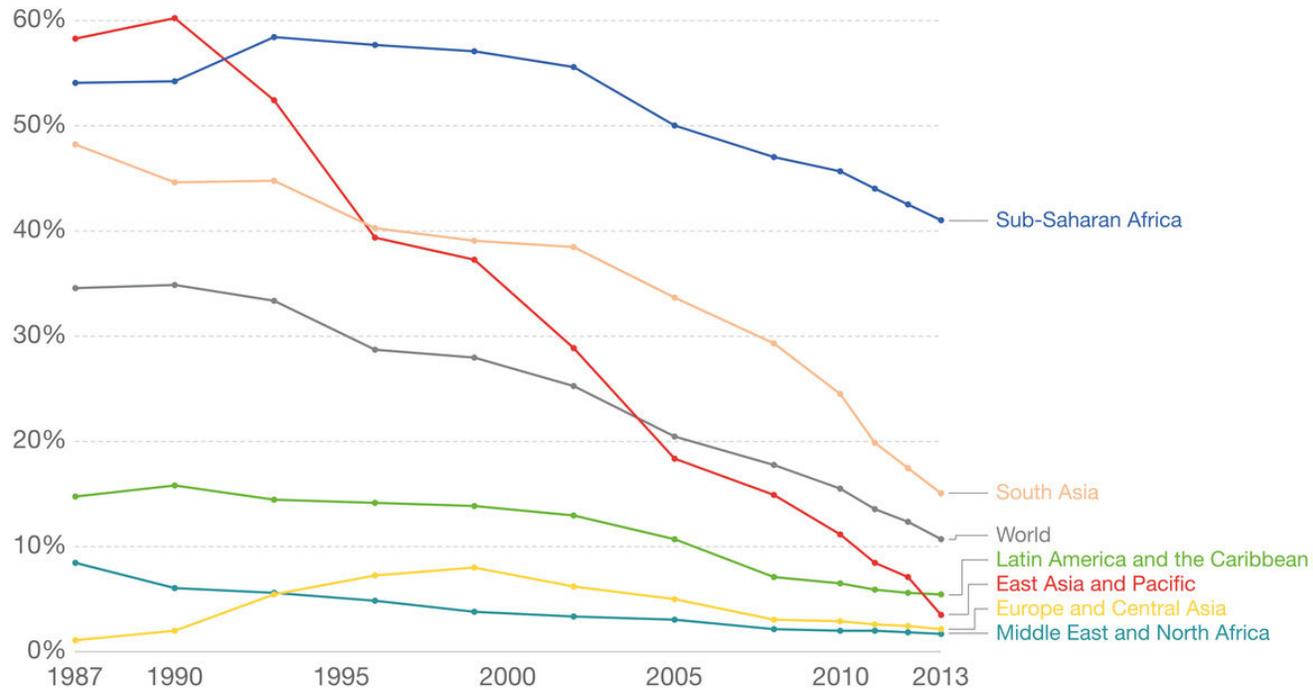

Source: EMDAT (2017): OFDA/CRED International Disaster Database, Université catholique de Louvain – Brussels – Belgium. The data visualization is available at [OurWorldinData.org](https://ourworldindata.org). There you find research and more visualizations on this topic.

Extreme poverty

Share of the population living in extreme poverty, by world region

Extreme poverty is defined as living with per capita household consumption below 1.90 international dollars per day (in 2011 PPP prices). International dollars are adjusted for inflation and for price differences across countries.

Source: Share of the population living in extreme poverty by world region - PovcalNet World Bank

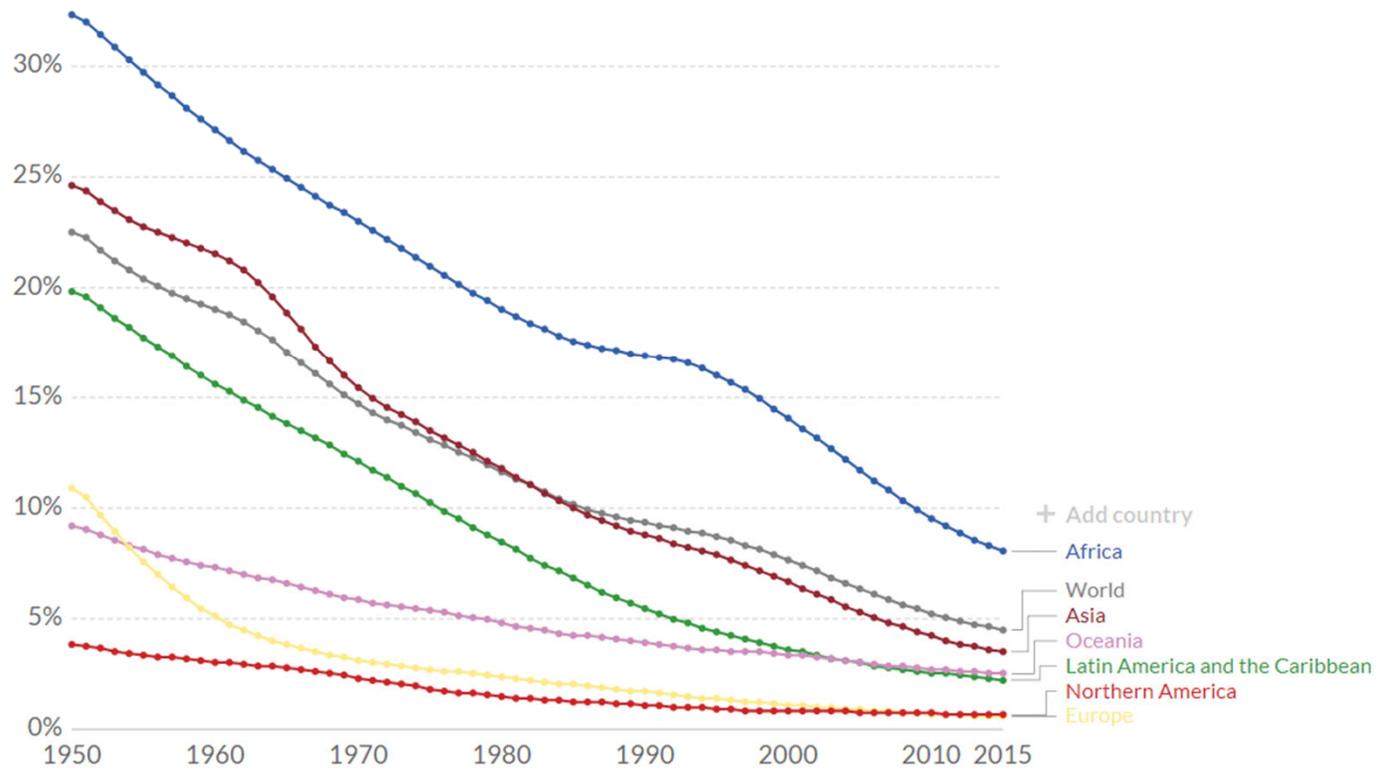

Note: Consumption per capita is the preferred welfare indicator for the World Bank's analysis of global poverty. However, for about 25% of the countries, estimates correspond to income, rather than consumption.

Inter-racial marriage, U.S.

Dramatic dive in share of nonblacks who would oppose a relative marrying a black person

% saying they would be very or somewhat opposed to a close relative marrying someone who is ___ among U.S. adults who are not that race or ethnicity

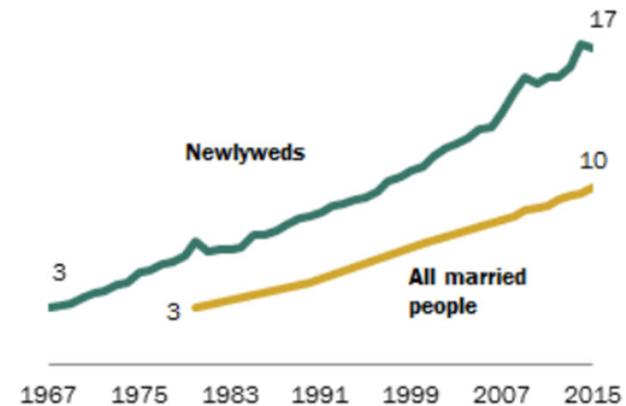

Note: Due to changes in question wording, the universe of nonblacks prior to 2000 includes anyone who reported a race other than black; in 2000 and later, the universe of nonblacks includes those who did not identify as single-race, non-Hispanic blacks (and so may include Hispanic blacks and multiracial blacks).
 Source: Pew Research Center analysis of General Social Survey.
 "Intermarriage in the U.S. 50 Years After Loving v. Virginia"

PEW RESEARCH CENTER

Since 1967, a steady rise in intermarriage in the U.S.

% who are intermarried among ...

Note: Data prior to 1980 are estimates. See Methodology for more details. For "all married people," 1980, 1990, 2000, and 2008-2015 data points are shown.

Source: Pew Research Center analysis of 2008-2015 American Community Survey and 1980, 1990 and 2000 decennial censuses (IPUMS).

PEW RESEARCH CENTER

My request (Take-home message)

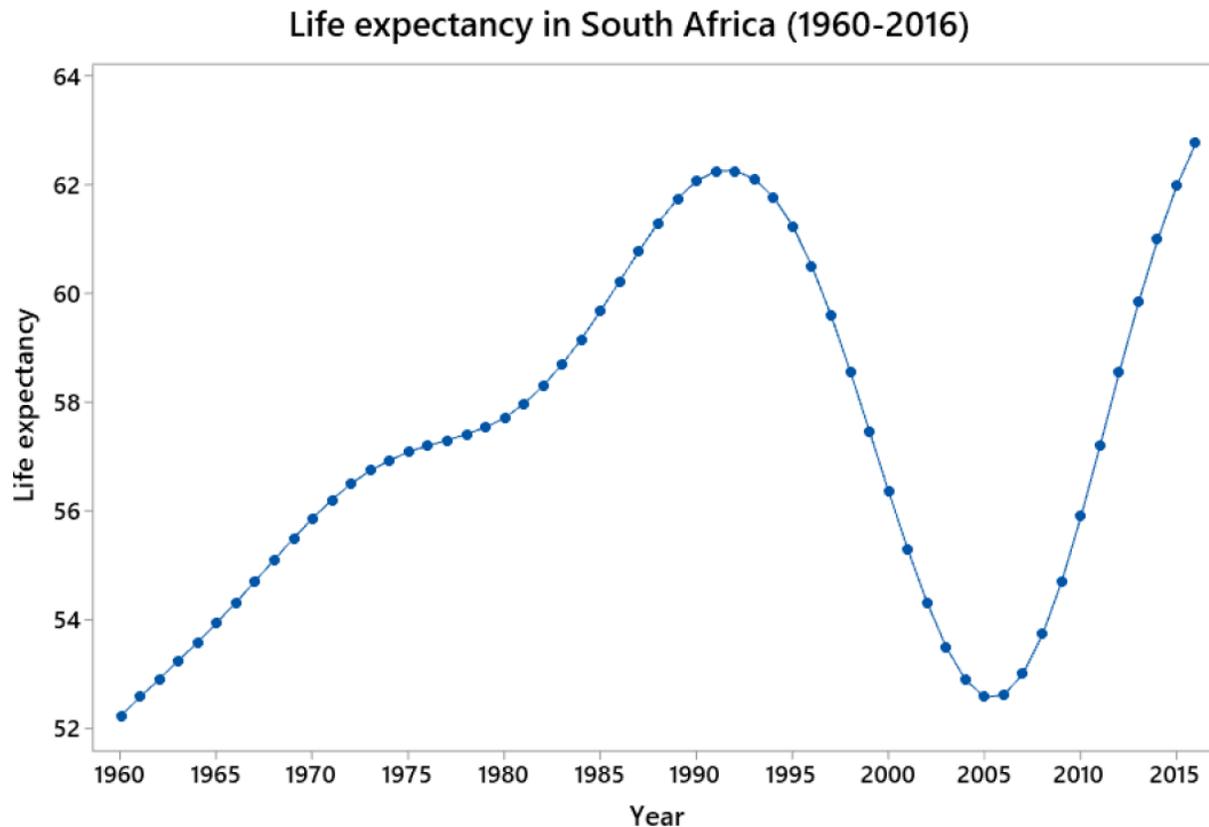

Use data, examples, activities, and assignments that make students aware of human progress.

Example 1: Life expectancy

- Describe what this graph reveals.
- Make an educated guess for the country.

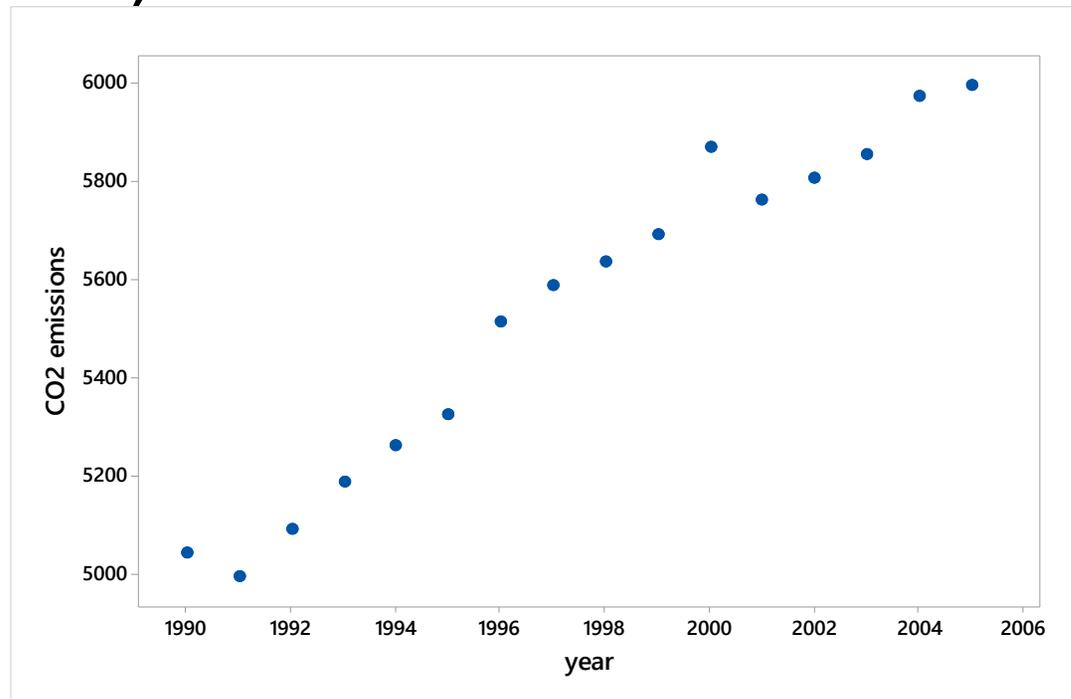

Example 1: Life expectancy

- Explain what happened in the 1990s.

Example 2: CO₂ emissions

- Energy-related CO₂ emissions (in millions of metric tons) in the U.S. from 1990-2005

- Source: <https://www.eia.gov/environment/emissions/carbon/>

Example 2: CO₂ emissions

- Use a least squares line to predict CO₂ emissions for the year 2016.

Predicted CO₂ emissions in year 2016

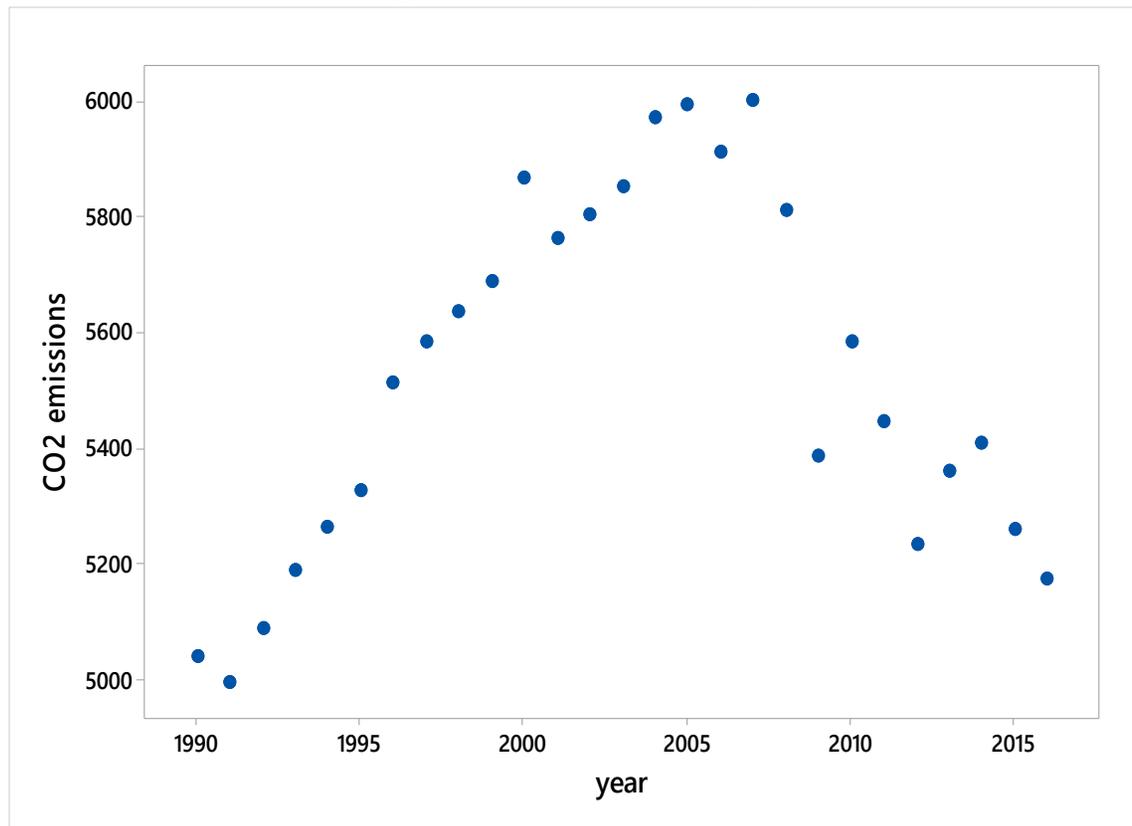

$$= -134,931 + 70.32 \times 2016 \approx 6834 \text{ mmt}$$

Actual CO₂ emissions in year 2016: 5170 mmt

- Determine percentage error of the prediction
 $(6834 - 5170) / 5170 \times 100\% \approx 32.2\%$

Example 2: CO₂ emissions

- What went wrong?? Extrapolation!

Example 3: Extreme poverty rate

- 1990: 35.9%
- 2015: 10.0%
 - Source: World Bank Development Research Group
- Did the percentage who lived in extreme poverty decrease by 25.9% over this period?
 - No!
 - The percentage decreased by 25.9 percentage points, which is different from a 25.9 percent decrease.

Example 3: Extreme poverty rate

- Percentage change = (new – old) / old × 100%

$$\begin{aligned} & (.100 - .359) / .359 \times 100\% \\ & = -.259 / .359 \times 100\% \\ & = -.721 \times 100\% \\ & = 72.1\% \text{ decrease} \end{aligned}$$

Example 4: Global poverty question

- U.S. survey: 5% of 1005 answered correctly
- Do the sample data provide strong evidence that less than one-third of all Americans would answer correctly?
- Test statistic: $z = \frac{.05 - .3333}{\sqrt{\frac{.3333 \times .6667}{1005}}} \approx -19.1$ (!!!)
- *Overwhelming* evidence that Americans do worse than random guessing on this question

Example 5: Global poverty question

- U.S. survey: 59% of 1005 answered “doubled”
- Estimate the proportion of all U.S. adults who would answer “doubled” with 95% confidence
 $.59 \pm .030: (.560, .620)$
- Interpret this interval.
 - We are 95% confident that between 56% and 62% of all U.S. adults would give the most wrong answer to this question.

Disclaimer

- Of course I also believe that much progress remains to be made in many important areas

Quote 4: Fact-based worldview

- “When we have a fact-based worldview, we can see that the world is not as bad as it seems – and we can see what we have to do to keep making it better.”

– Rosling

End-of-year/decade (Dec 2019)

- Nicholas Kristof, *New York Times*

This Has Been the Best Year Ever

For humanity over all, life just keeps getting better.

By **Nicholas Kristof**
Opinion Columnist

- Matt Ridley, *The Spectator* (UK)

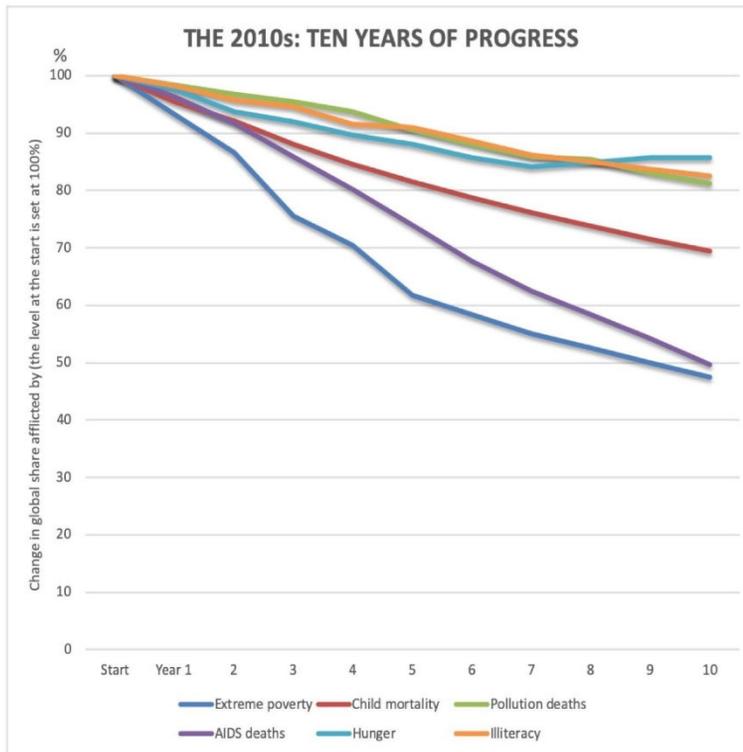

We've just had the best decade in human history. Seriously

Little of this made the news, because good news is no news

Matt Ridley

End-of-year/decade

Johan Norberg

Sources:
Overall: Johan Norberg's Progress
Poverty 2008-18: The World Bank
Child Mortality 2008-18: The United Nations

Pollution: 2007-17: Our World in Data
AIDS 2007-17: The Global Burden of Disease Project
Hunger 2008-18: Food and Agricultural Organization
Illiteracy 2008-18: The World Bank

2010s: HUMANITY'S BEST DECADE YET

- 28% OF ALL WEALTH EVER CREATED** 
- EXTREME POVERTY HALVED.** 
- CHILD MORTALITY RATE REDUCED BY A THIRD** 
- LIFE EXPECTANCY INCREASED FROM 69.5 TO 72.6 YEARS** 
- COUNTRIES CRIMINALIZING SAME-SEX ACTS DOWN 40% TO 27%** 
- COUNTRIES WITH LAWS PROTECTING WOMEN UP 53% TO 78%.** 
- DEATH RATE FROM POLLUTION DOWN 19%.** 
- WEATHER-RELATED DEATHS DECREASE 95% SINCE 1960S** 
- "PEAK STUFF" - CONSUMPTION OF 66 OUT OF 72 RESOURCES IS DECLINING.** 
- "NOT FREE" COUNTRIES DOWN 34% TO 26%** 

Sources: Overall: Johan Norberg, "Progress: Ten Reasons to Look Forward to the Future". 1) World Bank. 2) World Bank. 3) UN IGME. 4) UN. 5) ILGA. 6) World Bank. 7) Our World in Data. 8) Our World in Data. 9) McAfee, "More From Less" 2019. 10) Freedom House. Data collecting takes time, so some numbers refer to 2007-2017, 2008-2018 or 2009-19.

What about 2020?

- No doubt this has been a horrible year
 - In many ways unprecedented
 - Many measures of human progress may well decline in 2020, perhaps for a while
- We are better prepared to face such challenges than ever before
 - Working remotely
 - Vaccine development

What about 2020?

JUN 22, 2020

How a New Vaccine Was Developed in Record Time in the 1960s

It took just four years to get the mumps vaccine ready for market—but its development leaned heavily on groundwork that had been established during World War II.

Quote 5: When would you choose?

“If you could choose a moment in history to be born, and you didn’t know ahead of time who you were going to be, you’d choose *now*. Because the world has never been less violent, healthier, better educated, more tolerant, with more opportunity for more people, and more connected than it is today.”
– President Barack Obama, July 20, 2016
